PROJECTS

Analyzing & Predicting Medical Costs | EDA, Machine Learning, Regression

Exploratory data analysis and machine learning algorithms to predict medical costs. Built and deployed a model through a Flask API which achieved 86% accuracy using Random Forest regression.

Breast Cancer Classification | Machine Learning, Classification

Using machine learning classification algorithms to determine if various breast cell growths are malignant or benign. Achieved 92% accuracy by using the Random Forest Classifier.

Fatal Police Shootings in USA from 2015-2020 | Exploratory Data Analysis

An exploratory analysis on a Kaggle data set that details fatal police shootings in the USA from 2015 to 2020. In this project I explore several factors surrounding police shootings throughout the United States.
